

BEYOND WATERPROOFING:

CREATING BUILDINGS OF TRUST AND RELIABILITY

With UniPro[®]'s innovative new construction waterproofing services,
be assured of your buildings future readiness.

With UniPro®'s groundbreaking new construction waterproofing services, we redefine industry standards by employing unconventional systems that ensure unparalleled protection. We deploy out of box systems not only to fortify your structures but also enhance their overall efficiency. Our innovative techniques not only guarantee watertight integrity but also facilitate faster construction, saving valuable time and resources.

With UniPro, experience the future of waterproofing—where reliability, speed, and unconventional excellence converge to craft enduring, exceptional buildings.

Range of New Construction Waterproofing Services

1. Foundation Waterproofing

Foundation waterproofing is the first line of defense against water infiltration. We have protocols to prevent capillary rise from ground level reaching your walls which should be implemented during construction itself.

2. Basements/Cellars/Retaining Wall Waterproofing

Basements and cellars are continuously prone to high hydrostatic pressure.

Our consulting team can suggest state of art systems which you can choose from based on your budget and our execution team can execute it flawlessly to keep these areas dry and habitable.

3. External Wall Waterproofing

Every sand-cement plastered wall can have hairline cracks. External wall waterproofing safeguards your home's structural integrity and internal aesthetics. We offer a range of wall waterproofing systems with long warranties.

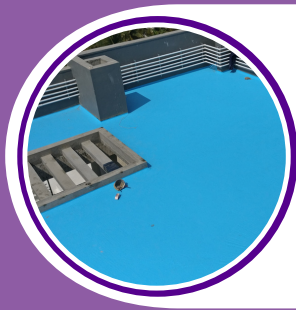

4. Sunshade Waterproofing

Even your sunshades need protection. Our solutions ensure that rainwater doesn't seep through walls, keeping your indoor spaces dry and enjoyable.

5. Toilets & Balconies Waterproofing

Waterproofing in bathrooms and balconies is crucial to prevent leaks and water damage. Over the years, we have developed a foolproof wetarea-waterproofing protocols so that the most water affected areas do not damage your aesthetics.

6. Terrace Waterproofing

Terrace waterproofing is very critical to your home interiors which involves multiple layers of protection, including membranes and coatings, to keep your terrace free from leaks. We have a range of chemistries in waterproofing to suit each project and budget

7. Planter Box/Roof Garden Waterproofing

Green spaces have to be handled with extra caution as it should not end up in damaging your home interiors. We can advise you to how to construct this area and use innovative anti-root solutions to prevent water from penetrating planter boxes and roof gardens, preserving their beauty and functionality.

8. Potable Watertanks Waterproofing & Food Grade Coating

Many of us do not know the hazards of storing potable water in cement tanks, which results in many gastric issues due to increase of alkalinity in the water we drink. Our team can advise you how to handle this critical area so as to provide a secure and hygienic water storage environment.

Why UniPro® Waterproofing?

1 Domain Expertise

UniPro® Group have domain expertise in their core areas of work such as waterproofing, sports flooring, commercial flooring, anti-skid flooring and soundproofing.

2 Unconventional Systems

UniPro® Waterproofing provides a wide gamut of services in advanced waterproofing for commercial & residential structures.

Faster construction

Reduced structural loads

Reduction in construction cost.

3 Timely Completion & Quality Delivery

UniPro® Group is a ISO 9001: 2015 certified company and we believe in quality delivery time after time. That is why once a client experience our services, they remain our customer for life.

9. STP/Sewage Tank Waterproofing & Chemical Resistant Coating

STP and sewage tanks contain many chemical and bio-residue wastes that can corrode a cement structure in the long term. They require special care to prevent leaks and contamination. We keep this in mind when we advice you with suitable systems to maintain the tanks' integrity and functionality.

10. Swimming Pool Waterproofing

Swimming pools demand superior waterproofing to withstand constant exposure to water. System varies when it is in ground or when it is elevated. Our solutions keep these in mind to keep your pool pristine and leak-free.

11. Exposed Brick/Laterite Stone Bricks /Terracotta Roof Tiles Waterproofing

Terracotta roof tiles, Exposed Brick/Laterite Stone Bricks are beautiful when they look natural but leaving it as it is can make it porous and super absorbant. We have special treatments ensure that they look natural but repel water, prolonging their lifespan and looks.

From foundation to roof, inside and out, our unconventional waterproofing services provide the ultimate protection for your new home. Contact us today to know more and to ensure a dry and worry-free living environment.
